XFINITY
WHEN *Accuracy* **MATTERS!**

Revolution and Precision - the two imperative qualities of weighing and balance. We are proud to have both on our hands, and want to bestow the qualities at your disposal as well

Our Vision
We often 'weigh' our options when it comes to choosing weight and balance options and services.

What if you come across market pioneers who not only excel in the highest quality standards but also keep the requirement of precision on the top?!

If that is what your work requires, you are skimming through the right glossies.

Our Mission
As weighing equipment experts, we aim to develop and calibrate through the high-quality process of designing weighing equipment, be it small-scale or large scale.

We believe what our delivered products and services speak for themselves before we can, and that is our true credit in the eyes of customers.

ELECTRONIC SCALES TECHNICAL SPECIFICATION

Characteristics Creep (as % of rated output/30 min)	0.03 %
Non Linearity (of rated output)	0.02%
Spindrift (counts per 10° C Max.)	2
Power consumption	10 W
AC Operating Voltage	230 V +/-10% 50Hz +/-1 Hz
DC Operating Voltage	6 V / 4.5 Ah
Operating Temperature	0° to 45° C
Relative Humidity (Non condensing)	90%
Warming Period	5 Minutes
Hysterisis (of rated output)	0.02%

FEATURES FOR ALL MODELS

- Prompt Service & Large Sales Network
- Hi-Tech Micro Controller Based Technology
- High Speed Weighing Response
- Attractive, Durable & Stunning Looks
- Sharp, Bright Easy to Read LED Display
- Auto Zero & Tare Facilities
- No Moving Parts & Maintenance Free
- Removable Stainless Steel Pan
- Linearity & Auto Zero Adjustment
- Audio Visual Over Load Indication
- Over Load Protection
- In Built Battery Backup
- Kg / Liter Conversion (Optional)
- Computer (RS 232) Interface Port (Optional)

CERTIFICATION
